Clear Water **BARLEY FLAKES** POND TREATMENT

**DO NOT EMPTY BARLEY FLAKES
FROM POUCH!**

**CLEANS PONDS BY REDUCING
PARTICLES AND ODORS**

INSTRUCTIONS FOR USE

- Calculate approximate water content of pond. Formula: Length x Width x Depth (in feet) multiply total by 7.5 to give formula in gallons.
- Simply remove micro mesh bag from plastic bag and place it in the pond. Micro mesh bag can be used in pond skimmers for pond clearing.
- Barley Flakes slowly degrade over three months as they keep pond clear. After three months the micro mesh bag should be thrown away and a new one put in its place.
- For best results keep Barley in pond year round.
- **IMPORTANT:** Barley Flakes may cloud water for the first few days up to a week before clearing takes place. Cleans ponds by reducing particles and odors.
